

Quilted Studio Blanket

These light weight Acoustic Blankets are faced in an aesthetic and durable fabric with a 35mm thick internal fibre core giving a high level of acoustic absorption, they are backed with a Velcro fleece allowing easy fitting onto any surface even ceilings. The blankets are then edge bound and Quilted to give a unique product that can be made to fit any size space. The standard size is 2.0 x 1.2 metres but can be made up to 15 metres long and up to 1.7 metres wide.

They are designed to be attached to a hard surface or can also be suspended from a fixed bar or track or and can be supplied with industrial eyelets inserted into the top edge. They are also available with hooks if required.

Quilted Studio Blankets are available in a range of colours and offer high levels of noise attenuation. They are suitable for use in many applications and also used as an alternative to acoustic panels where acoustic absorption is required, we also make them with a moisture resistant wipe clean surface.

Properties

THICKNESS

50mm (nominal)
